

HD WIDE ANGLE CONVERSION LENS SERIES

Wide Angle Conversion Lens

PRO5850HD

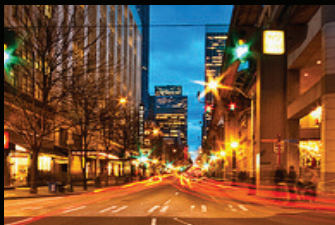

0.5x for Prosumer and DSLR
Capture Wide HD Pictures

The **M5850HD** wide angle conversion lens is designed to be used exclusively for prosumer cameras.

When mounted onto prosumer digital camera, it enables the maximum wide angle to be increased by 50%, allowing more details to be captured in a single image. The 2 element optical glass system is fully coated to attain maximum light transmission and image clarity.

Other features include detachable macro attachment for closeup photography, darken glass edges and pro matt housing finishing to minimize external flare and reflection from entering the lens. 67mm front filter threads further allows the placement of filters for other required effects.

18mm Standard Lens
